sagarshivaji6644@gmail.com

Hyderabad, India

PROFILE

AI Product Designer with experience designing B2B SaaS platforms, AI-powered workflows, and enterprise products. Skilled in simplifying complex requirements through user flows, prototyping, interaction design, and scalable design systems. Comfortable collaborating with product and engineering teams from concept to implementation.

EXPERIENCE

AI Product Designer

Mar 2026 – Present

Vensiti Inc. (via Techgene Solutions) – Hyderabad, India

- Designed an **AI Bench Sales Platform** to simplify recruiter workflows and candidate matching.
- Led UX design for an **AI Lead Generation System**, simplifying lead discovery, filtering, and sales workflows.
- Designed AI-assisted experiences including suggestions, filters, automation workflows, and action triggers.
- Created and maintained a reusable **Figma Design System** for internal AI products.
- Collaborated with developers and stakeholders to translate business requirements into user flows, prototypes, and production-ready interfaces.

AI Product Intern

Dec 2025 – Feb 2026

Vensiti Inc. (via Techgene Solutions) – Hyderabad, India

- Designed user flows, wireframes, and high-fidelity prototypes for internal AI-powered products.
- Worked on complex enterprise workflows and translated product requirements into simple, usable interfaces.
- Collaborated with developers during implementation to maintain design consistency and usability.

UX Design Intern

May 2025 – Jun 2025

Brain Quest – Remote

- Created responsive wireframes focused on usability and accessibility.
- Collaborated with designers to iterate on high-fidelity interfaces.

SKILLS

Product Design User Research, User Flows, Wireframing, Prototyping, Interaction Design, Accessibility, Design Systems

AI Product Design Human-Centered AI, AI UX Patterns, Prompt Design, Automation Workflows, OpenAI APIs

Tools Figma, FigJam, Framer, Adobe Illustrator, Adobe Photoshop, Stitch, Antigravity

Development HTML, CSS, JavaScript, React, Python

EDUCATION

Malla Reddy Institute of Technology and Science

2021 – 2025

B.Tech – Computer Science & Engineering (AI & ML)

CERTIFICATIONS

Google – Foundations of User Experience (UX) Design • System Design – TuteDude • 100 Days of Code – Python

SELECTED PROJECTS

Job Pulse – Automated Job Tracking Platform

Product Designer & Developer

- Designed and developed an automated dashboard that helps users discover job opportunities without manually monitoring multiple job boards.
- Designed the experience from job discovery and filtering to automated notifications.
- Integrated real-time job notifications through Discord and Telegram.

Google Maps Reroute – UX Case Study

Product Designer

- Studied the experience of unexpected route changes during navigation and identified opportunities to improve clarity.
- Explored how users could better understand why a route changed and compare available alternatives.
- Designed an improved rerouting experience focused on reducing uncertainty and increasing user confidence.

Daily Story Teller – Kids Storytelling App

Product Designer

- Designed a storytelling experience for children with simple, age-appropriate navigation and interactions.
- Created user flows, wireframes, and high-fidelity mobile interfaces for the core storytelling experience.
- Focused on readability, visual engagement, and reducing interaction complexity for younger users.

FreshFold – On-Demand Laundry Service

Product Designer

- Designed an end-to-end laundry service experience covering booking, pricing, scheduling, and order tracking.
- Conducted UX research to understand user concerns around transparency, reliability, and service tracking.
- Translated research findings into user flows, wireframes, and high-fidelity prototypes.

CORE STRENGTHS

B2B SaaS	Simplifying complex enterprise workflows into clear, usable product experiences.
AI Products	Designing human-centered AI interactions, automation, suggestions, and decision-support experiences.
Design Systems	Building reusable components and patterns to maintain consistency across products.
Technical Collaboration	Understanding front-end development and AI systems to collaborate effectively with engineering teams.
